Accessories NANO 250

Mounting Plate NANO 250 FN

The universal adapter lets you mount the fiber coupler (available separately) or the LINOS Nanobench[®] system, and is attached directly to the front plate of the laser using four M 2.5 screws.

The fiber coupler is plugged into the universal adapter through a bore hole and secured by threaded connectors. No further centering is required.

The adapter has four bore holes of 4 mm diameter for adaptation to the Nanobench[®] system.
