

FGC-G

Fiber Glass Geometry Measurement System

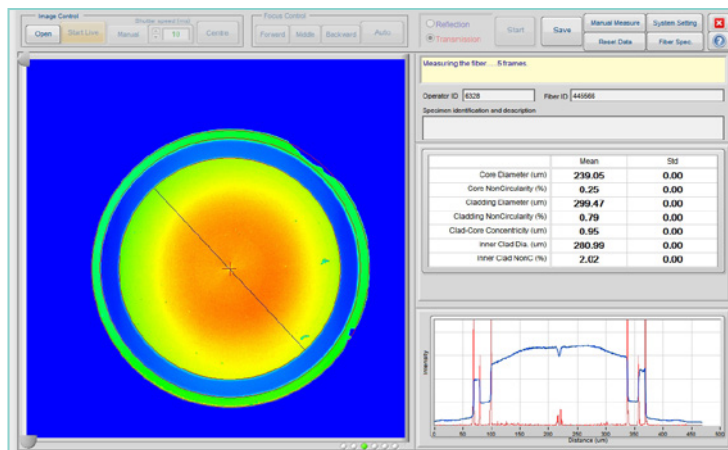

The FGC range is the complete solution for measuring the dimensions of standard and specialty fiber in both production and R&D environments. The FGC-G comes in 2 different models:

- FGC-GT – fiber glass geometry for fibers up to 400 µm diameter
- FGC-GS – fiber glass geometry for fibers up to 1000 µm diameter

Features & Benefits

- Measures the widest range of fiber sizes and types
 - single unit solution means less bench space, reduced training
- Standards compliant
 - calibrated to international standards, ensuring confidence in its accuracy
- Production ready
 - reliable, repeatable, operator-independent results in seconds
