The RBA CW pumped Nd:YAG laser module is an ideal building block in the development or production of medium power rod laser systems, the conversion of existing lamp-based laser designs to diode-pumping, or retrofit of existing arc lamp hardware to provide more stable and reliable operation.

*All prices displayed are US Domestic (per unit / low quantity) prices; please contact us for higher volume price structure.*

**SPECIFICATIONS**

|                      |                               |
|----------------------|-------------------------------|
| Power                | 75 W                          |
| Number of Diode Bars | 12                            |
| Power Per Bar        | 20 W                          |
| Pump Power           | 240 W                         |
| Rod Type             | Nd:YAG                        |
| Rod Diameter         | 3 mm                          |
| Rod Length           | 73 mm                         |
| Diode Construction   | Silver Bullet (indium solder) |
| Operation            | CW                            |
