## X-Cite® 110LED – Product Discontinuation

---

As expected, demand for the X-Cite 110LED has declined since the introduction of the new X-Cite TETREM™, which offers higher output and individual channel control within the same compact footprint and price range. As a result of this shift in customer demand, Excelitas® will discontinue the X-Cite 110LED.

### Recommended Alternatives:

For customers who require broadband fluorescence excitation at a similar price point to the 110LED, we invite you to consider these alternatives:

- [X-Cite TETREM™](#) - covers DAPI, FITC, TRITC, Cy5, and provides higher excitation power than the 110LED; the smartDIAL™ controller allows individual or simultaneous LED control
- [X-Cite mini+™](#) - direct-mount, broadband light source covering DAPI, FITC, TRITC, Cy5

Demo units are available to help you evaluate the performance and capabilities of these two powerful LED illumination systems.

### Last-time purchases:

Remaining X-Cite 110LED stock is available on a *while supplies last* basis. Given the limited availability, please contact us as soon as possible to purchase a unit.

### Service:

As with all X-Cite products, technical support and repair service will continue to be available for a minimum of five years following discontinuation (i.e., January 2031).

If you have any questions about this notice or any other X-Cite product, please feel free to contact your account manager or reach out to me directly.

Thank you for your continued support of X-Cite products.

Best Regards,

Michelle Gal  
Senior Product Manager, X-Cite
